

## POWERFUL GIGABYTE INFLEX MODULES

Designed by Sweden's fine product designers we introduce a new flexible way of selecting a solution that is perfect for your specific project needs. Start by choosing a beautifully designed INFLEX monitor manufactured with the finest materials and components available for digital signage. Then based on your storage and processing needs select a INFLEX system module that meets your needs at an optimal price point.

This approach allows you to be in control of all the aspects of your solution, best of all there is support for all the major operating systems on the market today, be it Windows, Android or Linux. The choice is yours.
