

### INSHELF ALL-IN-ONE SCREEN

INSHELF industrial grade screens are developed specifically for shelf integration in the retail environment. The powerful INTEL™ N2930 based processing unit is integrated in the under shelf mount assembly. The wide screen display pivots forward when restocking the shelves with product, everything is designed to work with the real-life requirements of the retail environment.

We have made every effort to make sure that our Retail Technology Solutions (RTS) products integrate and work seamlessly in real-life environments. They have been mounted and tested on most of the shelves available on the market today. They are of course designed to work in harmony with our new INTRACK power distribution solution as well.

### INSHELF FEATURES

- Powerfull INTEL™ N2930 based processing unit
- Bright ultra-wide HD display with LED backlight
- Fast WiFi and Gigabit lan for online connectivity
- Fast USB 3.0/2.0 ports for external accessories
- Support for Windows 7/8/10 IoT and Linux
- Integrated shelf mounting and pivot screen hinges
